V2.0.0

July 2021

Updated with the SDK 2.0.0.

Support for full C-Series range of cameras.

During playback, black screen is displayed to signal end of video.

V1.21.0

January 2021

Support for ColorMap compression feature on C-Series Cameras.

Processing and CPU efficiency improvements.

Deprecated API(s) usage have been removed and the plugin user interface updated to match.

V1.1.4

October 2017

Processing and CPU efficiency improvements.

V1.1.3

May 2016

Fixed an issue which could cause the plugin to fail on Milestone Smart Client 2016.

V1.1.2

January 2016

Created a single 32bit and 64bit compatible version of the plugin.

Fixed an issue where recordings created on a 64bit machine could not be played back on a 32bit client.
