

APPLICATION OF SECURITY SOLUTIONS

Keeping goods and staff safe.

A robust, highly reliable and cost-effective
method of monitoring activity everywhere.

KEY CHALLENGES

The success of the logistics industry strongly relies on the assumption that all goods reach their destination timely, safely and undamaged. However, with an increase in organised crime, securing the secure transit of goods has become increasingly challenging. Businesses, when considering which security surveillance to integrate, must focus on a customisable solution that answers their needs and concerns. Oncam's 360-degree and wide-angle technology can be tailored to business goals, providing a flexible, effective and efficient security solution.

Health & Safety

Ensuring that health and safety procedures are followed at all times can be tricky. With Oncam's technology, bigger areas can be surveyed live and in record mode, meaning no incident will be missed.

Tracking of Goods

Security is a growing concern in the logistics industry, due to good being passed from provider to provider. Video surveillance helps monitor activity in large warehouses and keep track of goods.

Liability

The use of wide-angle and 360-degree recorded video can play a valuable role in verifying the cause of an injury of workers or staff members, as well as protecting from fraudulent claims.

Operational Efficiency

Improve efficiency and ultimately ROI by monitoring activities and tracking how goods are handled. Footage can be used retrospectively, customer or employee claims.

Monitoring Large Areas

An Oncam solution can monitor activity discreetly in all areas of a warehouse and of any external goods handling spaces such as loading bays or shipyards.

Reduced Camera Count

One wide-angle or 360-degree camera can often replace several traditional cameras and because Oncam's cameras have no moving parts, it will reduce annual maintenance costs.

ONCAM SOLUTIONS

Having successfully provided award-winning 360-degree technology solutions to an international logistics and supply-chain company's site, Oncam delivers unique and flexible solutions where production supervisors and security personnel can experience the power of our 360 and wide-angle surveillance cameras. Reliable and adaptable, Oncam solutions address the current challenges in keeping warehouses safe and secure.

01

Evolution 12 Series

The Evolution 12 cameras are fit for monitoring large spaces. Available in various form factors (Indoor, Outdoor, Concealed and Recessed), they are suitable for every type of environment and are designed for quick and easy installation.

02

Evolution 05 Mini Series

With a very compact design, the Evolution 05 Mini range of cameras, such as the Indoor Night and Panel-Mount, are ideal for the logistics industry as it provides a discreet solution suited for use in narrow, dark or low-light environments.

03

Evolution 180 Series

Oncam's Evolution 180 cameras are optimised for wall mount applications. The dewarped Panoramic+ views are perfect for aisles or perimeters, offering clear view of passing traffic while capturing a wide area of coverage, both indoor and outdoor.

04

ONVU360 App

Our app is a world's first: a mobile application that enables users to fully experience 360-degree surveillance in high resolution, wherever they are and at the palm of their hands. It is downloadable for free from the Apple App Store and Google Play Store.

05

Advanced Dewarping

Footage shot with Oncam's 360 and 180-degree cameras offers clear and detailed videos. Oncam's advanced 3D dewarping allows users to review footage at any time, offering the best and most user friendly experience in the 360-degree surveillance market today.

06

Flexible and Scalable

Solutions offered by Oncam are scalable and flexible. Thanks to their compatibility to ONVIF standards, Oncam cameras are compatible with the vast majority of VMS and NVR platforms, to create modern, functional and long-term surveillance solutions.

*"THE ONCAM 360-DEGREE
CAMERAS' DEWARPING
CAPABILITY AND IMAGE QUALITY
MAKE THEM THE BEST ON THE
MARKET TODAY, AND THEY'RE
THE ONLY ONES WE USE"*
